

## Travis Kvapil Takes Second in 2004 NASCAR Craftsman Truck Series Debut

*Daytona, FL (February 14, 2004)* - Travis Kvapil, driving the #24 LINE-X Truck led 15 laps and took second place in last night's opener to the 2004 NASCAR Craftsman Truck Series in Daytona.

"We definitely had a truck that was capable of winning," said Kvapil, who finished second in this race a year ago. "You know, to come out of the box with a good finish, that was the main thing. We definitely are looking at the 2004 championship. That's what I want to do. That's what I'm focused on. I know we got a team that can do it. I know we got a manufacturer and sponsor that can do it."

"To come out of the box second -- that's what I did last year. Things worked out for the rest of the year. Just got to be there at the end."

"I'm excited," Kvapil said. "Obviously, there were a lot of question marks coming into this race. I knew they were going to give us some horsepower. I do know numbers still show we're down a little bit. ... I was happy that it ran the whole race."

"I'm just happy to kind of prove that we can run a couple hundred-mile races. I know they're going to go back and still find us some more horsepower to get us up to where we need. To come out of the box this strong, knowing we're only going to get better, is pretty exciting."
